SUMMARY *(This is an optional section)*

I'm a Data Analyst professional with a background in AWS and Salesforce Marketing Cloud. Alongside my technical work, I have strong leadership experience. I specialize in analyzing and creating reports on operational data and trends to improve system performance and maintainability. With tools like Microsoft Excel, SQL, and multiple programming languages I translate technical issues into actionable insights for my team, reduce inefficiencies, and support data-driven business decisions.

EDUCATION

University of Dayton, Dayton, OH
